EDUCATION

University of North Carolina at Charlotte — **Charlotte, NC**
M.S in Computer Science (GPA: 4.0) — *Aug 2025 - Dec 2026*

NMAM Institute of Technology — **Karkala, Karnataka, India**
B.E in Information Science (CGPA: 8.9) — *Aug 2019 - October 2023*

WORK EXPERIENCE

Arch Mortgage Insurance Company (Arch MI) — **Greensboro, NC**
Software Engineer Intern — *June 2026 - August 2026*

- Architected and deployed a **RAG application** for mortgage insurance underwriters, improving massive document querying workflows from hours to seconds; built POCs around **chunking, hybrid vector-graph search, reranking, and prompt engineering**, and created ground-truth evaluation datasets.
- Automated **Azure AI Evals** across multiple metrics, reaching ~**95% response accuracy** through iterative optimization.

University of North Carolina at Charlotte — **Charlotte, NC**
Research Assistant — *Jan 2026 - May 2026*

- Engineered **stateful agentic tutoring application** with **LangGraph**- coordinating planner, tutor, and evaluator agents for adaptive conversations and assessment; implemented persistent memory and context engineering with PostgreSQL checkpoints, conditional routing, and prior-session learning gaps to personalize follow-up questions.
- Built a **RAG based recommendation pipeline** with Sentence Transformers, pgvector indexing, hybrid retrieval, and reranking, grounding student recommendations in historical reflections.
- Automated LLM-as-a-judge and agent evaluation with **LangSmith, RAGAS, and DeepEval**; integrated OpenAI, Groq, Ollama, and **MCP** tools through FastAPI and a Dockerized React application.

ACI Worldwide — **Bangalore, Karnataka, India**
Associate Software Engineer — *September 2023 - June 2025*

- Migrated a monolithic **Spring MVC** backend to **Spring Boot microservices**, developing and testing RESTful services and API integrations; maintained production services through **hotfixes, feature upgrades, and SQL database scripts**.
- Contributed to frontend development using **Angular**, implementing UI components and API integrations; supported API automation and validation with **Postman** for regression testing.
- Leveraged **CI/CD pipelines** on VMware Tanzu and RedHat OpenShift; implemented **DevSecOps** practices using **Checkmarx, Black Duck, AppScan, and Burp Suite** for secure, scalable delivery.

PROJECTS

NMAMIT Map *github.com/tAnboyy/NMAMIT-Guide*

- Developed an **Android application** using Java, Kotlin, Google Maps API for GPS and live tracking, and Firebase for data management to help students navigate the NMAMIT campus.
- Deployed the app to the Google Play Store through Google Play Console, achieving **500+ downloads**.

Incridea (College fest website) *github.com/tAnboyy/Incridea-Website-22*

- Collaborated with a team of 6 to develop the college fest website, implementing the frontend with **React.js**, backend APIs with **Node.js**, and **Firebase** and **Razorpay** integrations.
- Deployed the project on Heroku, scaling to **~10k live users** and generating **INR 20L (~USD 24k)** in revenue.

SKILLS

Languages & Databases: Java, Python, Kotlin, JavaScript, TypeScript, SQL (Oracle, PostgreSQL), MongoDB, Cassandra, Redis, Vector Databases, Graph Databases

AI & GenAI: RAG, Agentic AI, LangGraph, LangChain, LangSmith, RAGAS, DeepEval, OpenAI API, Groq, Ollama, Azure AI Evals, Hybrid Search, Reranking, MCP, Codex, Claude Code

Frameworks & Tools: FastAPI, Spring Boot, Node.js, React.js, Angular, Apache Kafka, RabbitMQ, Docker, Kubernetes, Nginx, EFK Stack, Zuul, Eureka, Ribbon

Cloud & Development Practices: Google Cloud Platform (GCP), Linux, CI/CD, DevOps, Agile, SDLC, Monitoring Tools (Prometheus, Jaeger)
